1.	 This report is the international preliminary examination report, established by this International Preliminary Examining Authorit under Article 35 and transmitted to the applicant according to Article 36. 							
2.	This R	EPORT consists	of a total of	5	sheets, inclu	uding this cover sheet.		
3.	This re	eport is also acco	mpanied by A	NNEXES, comprising:				
	a. 🔼	(sent to the	applicant and	to the International Bure	eau) a total of 7	sheets, as follows:		
l !	sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).							
	sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental							
	_	Box.						
	ъ	sent to the	International	Bureau only) a total of (i	ndicate type and nu	umber of electronic carrier(s))		
						, containing a sequence listing and/or tables		
related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (section 802 of the Administrative Instructions).								
4. This report contains indications relating to the following items:								
	\boxtimes	Box No. I	Basis of the	e report				
	\bowtie	Box No. II	Priority					
		Box No. III	Non-establi	ishment of opinion with r	egard to novelty, in	eventive step and industrial applicability		
		Box No. IV	Lack of uni	ty of invention				
	\boxtimes	Box No. V		tatement under Article 35 d explanations supporting		novelty, inventive step or industrial applicability;		
		Box No. VI	Certain doc	cuments cited				
Box No. VII Certain defects in the international application				pplication				
Box No. VIII Certain observations on the international application

Bo	ox No. II Priority
1.	This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:
	copy of the earlier application whose priority has been claimed (Rule 66.7(a)).
	translation of the earlier application whose priority has been claimed (Rule 66.7(b)).
2.	This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.
3.	Additional observations, if necessary:

- 2. Citations and explanations (Rule 70.7)
 - Claim 1 of the present application contains two linked or connected groups of features and therefore effectively presents two versions of the claim.

EP-A-1 310 577 (D1), which is considered to represent the prior art closest to the subject matter of claim 1, discloses (see figure 1) a radial plunger pump as per the preamble of claim 1 with a piston sole plate 103 which contacts a peripheral surface of a roller 200. Further, the surface of the piston sole plate 103a which contacts the peripheral surface of the roller is made of a wear-resistant hard metal (figure 12 and column 19, lines 7-15).

The first version of claim 1 differs therefrom in that the wear-resistant materials indicated in the claim are applied to the piston sole plate of the radial plunger pump in the form of insets. This makes possible a modular structure: that is, in each application a standardized piston sole plate can be provided with insets of a different

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

material. Such an inset is not known from the available prior art and no suggestion relevant thereto is provided.

The second version of claim 1, whereby the roller consists at least partially of the wear-resistant materials indicated in the claim, is likewise not suggested by D1, since this describes only the use of normal cast iron (column 19, lines 14-15).

Claims 2-14 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.
